

plss_names

Location: property\plss_names

Description

These data consists of points and lines useful for labeling Public Land Survey System townships in Bay County.

Points in **plss_names.shp** are located just outside the northern and eastern county boundary.

Lines in **plss_names_ln.shp** are located 1000 feet away from actual township lines.

For actual township lines, use **plss_ln.shp** or **plss.shp**.

Coordinate system: State Plane, Florida North Zone, Datum NAD83, feet (see **.prj** file)

Source

In August 2000, Bay County GIS staff created these points heads up in Arcview.

In April 2004, Bay County GIS staff created these lines by selecting township lines in **plss_ln.shp**, buffering by 1000 feet, and clipping by **countygeneral.shp**, using Arcview. Using ArcEdit, some lines were deleted and split. Attributes were entered in Arcview. (For more details, see **plss_names_ln.dls**)

This data is for graphic purposes only. Display the labels, not the points and lines in this data. Point labels work best centered on point. Line labels works best centered on line allowing duplicates.

This data is provided with the understanding that the conclusions drawn from such information are solely the responsibilities of the user. The GIS data is not a legal representation of the features depicted, and any assumption of the legal status of this data is hereby disclaimed. Errors or omissions should be reported to the Bay County GIS Division 850-784-6171.

Point and Arc Attribute Table Structure

Item Name	Width	Output	Type
label	12	12	char

Attributes

label

Township label.

Northern points have column (range) values from "R12W" to "R17W".

Eastern points have row (township) values from "T1N" to "T2N" and from "T1S" to "T6S".

Lines have values from "T1N R12W" to "T3S R17W" to "T6S R13W"
